JURUSAN TEKNOLOGI INFORMASI
POLITEKNIK NEGERI MALANG 2022**

1. App's Description

Train ticket booking application

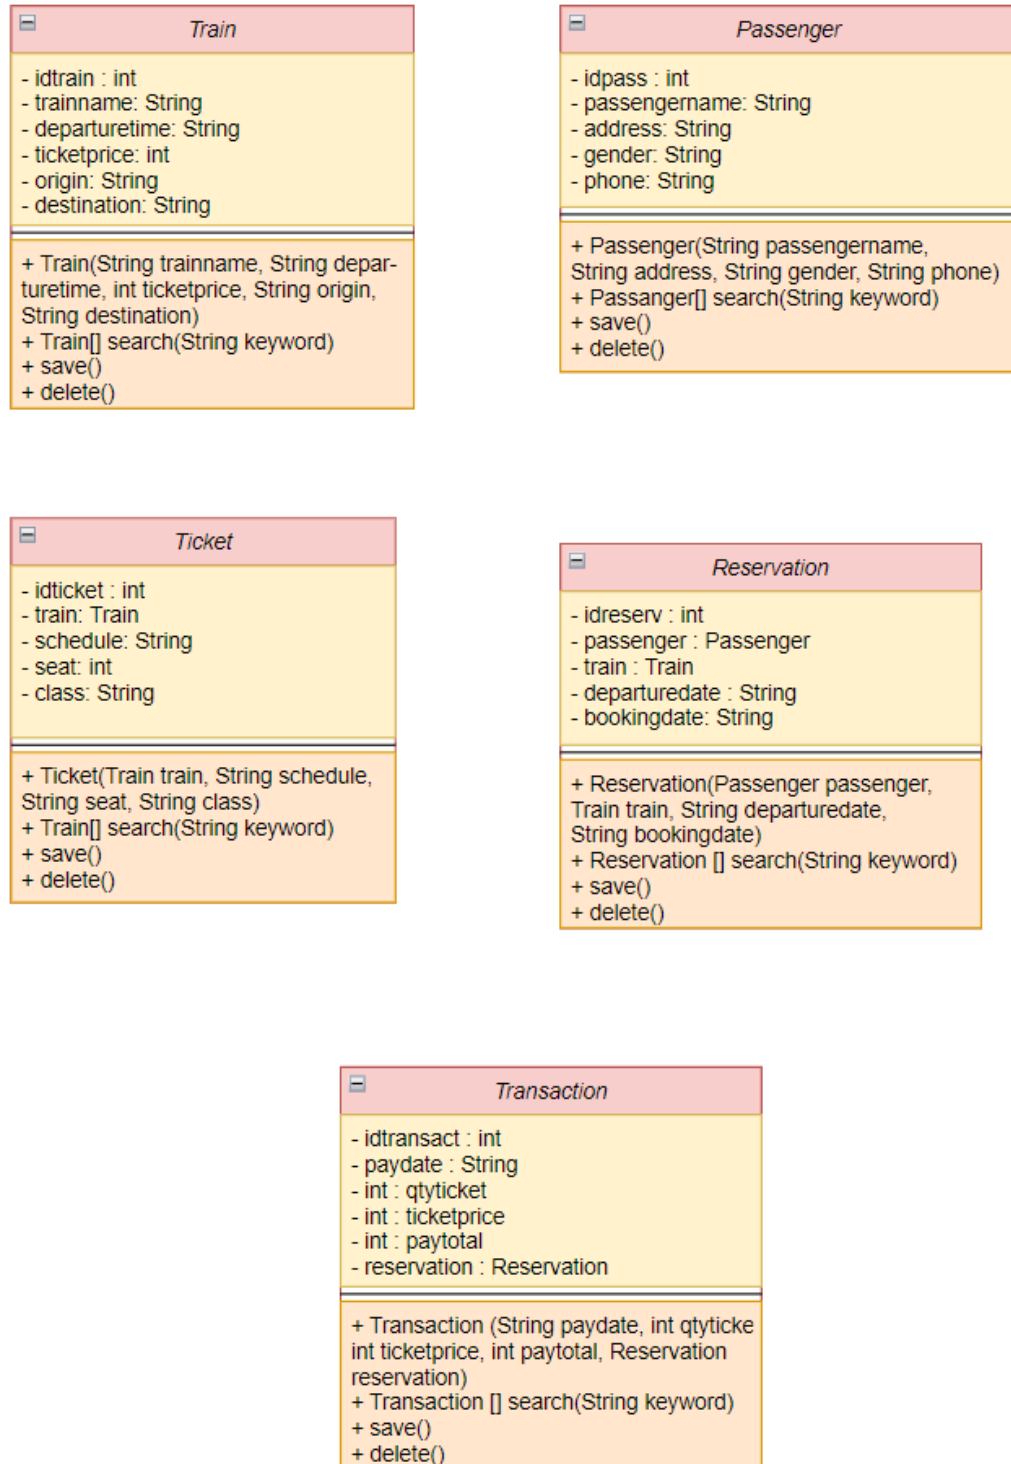

Description: Passenger can booking a train ticket, by inputting their data, choose train and schedule, make a reservation, then they can buy ticket, and transaction.

The data that passenger's input will be appear on the table below.

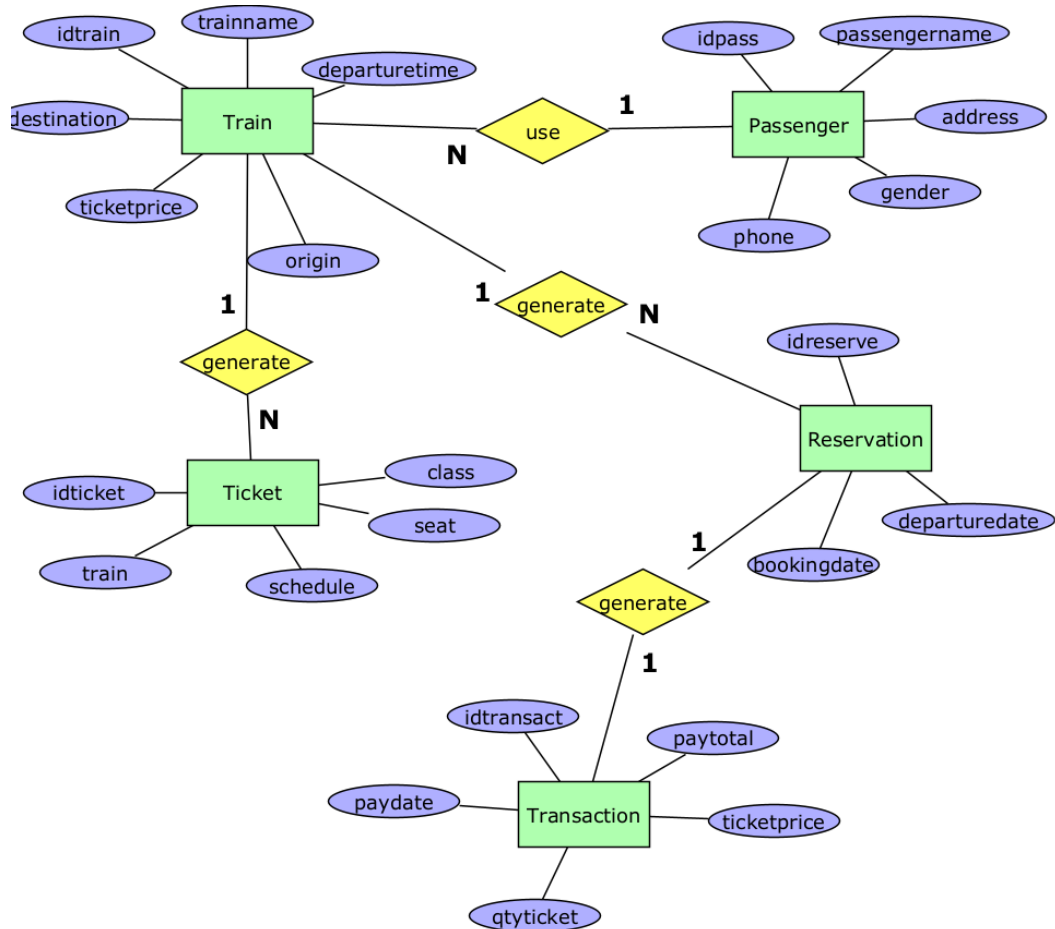

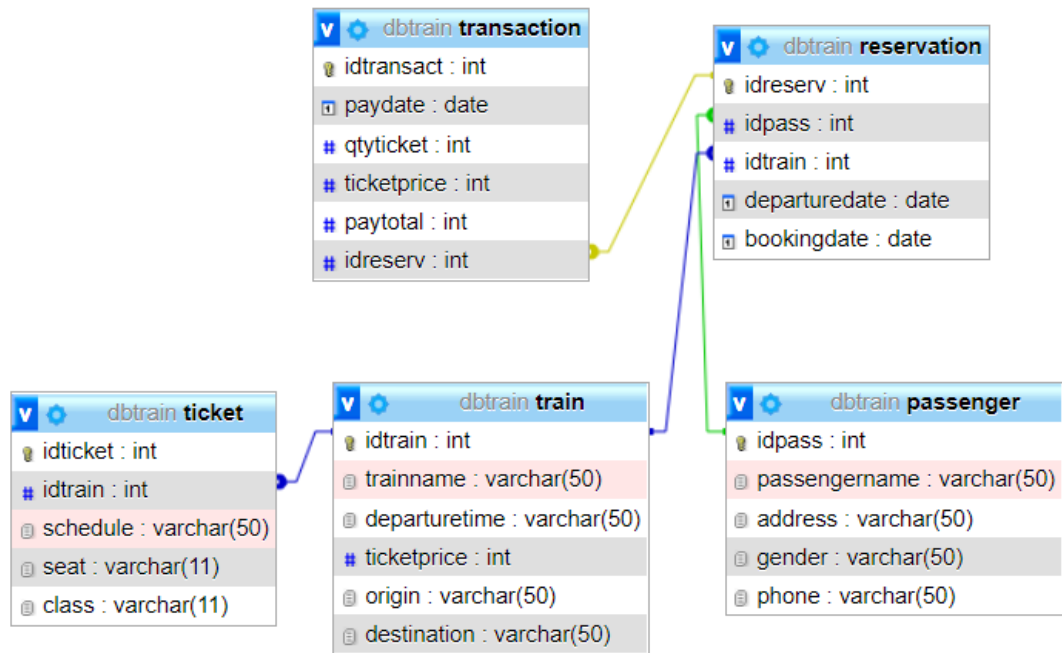

- Train Details: There are save, add new, delete, search and exit features. So in this form we can add a train by entering the name of the train, departure time, ticket price, station of origin and destination station. After everything has been filled in, you can click the save button on the form and the data will be registered in the column provided.
- Passenger Details: There are save features, add new, delete, search and delete. So in this form we can add passengers by entering their name, address, gender then telephone number, after all is filled in you can click the save button on the form and your data will be registered in the column provided.
- Reservation Details: There are save features, add new, delete, search and exit. So in this form we can add a reservation by entering the passenger's name and bus name by selecting existing data, departure date, booking date, after all is filled in you can click the save button on the form and your data will be registered in the column provided.
- Ticket Details: There are save features, add new, delete, search and exit. So in this form we can add tickets by entering the name of the bus by selecting existing data, schedule, seat number then the class of bus to be boarded, after all is filled in, you can click the save button and your data will be registered in the column that has been provided.
- Transaction Details: There are save, add new, delete, search, and exit features. So in this form you can add transactions by entering the payment date, number of tickets, ticket price, total payment, and reservation. Select a pre-booked date. Then, clicking the save button on the form and the data will be registered in the column provided.
- Other features:
 - Search: Type what you want to search for, then click the search button
 - Remove: Click data you want to remove, then click remove
 - Click Logout for Exit

The Actor: Admin
